

One-Minute Activation Instructions

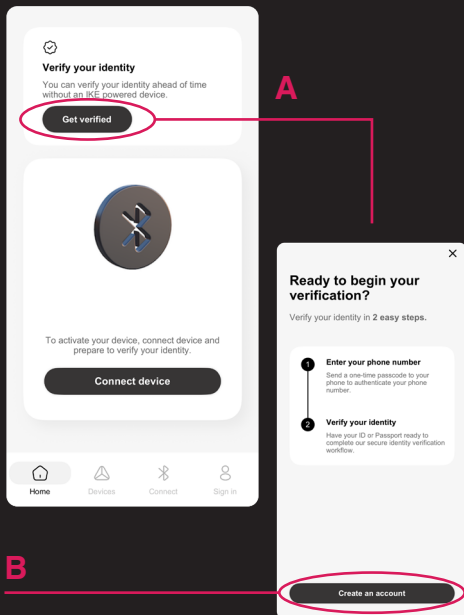

To get started,
you will need:

- ✓ Valid Government-Issued ID Card or Passport
- ✓ iOS or Android Mobile Device with Camera
- ✓ Authentic **PACHA** age-gated Vape Device

1. Age Verification

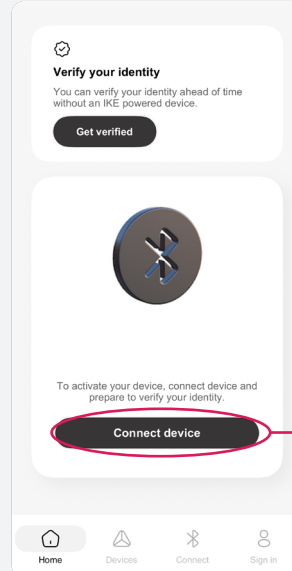

When you open the app, start the age verification process first. **This is required before connecting any PACHA age-gated vape device.**

01. You will be asked to enter your phone number to create an account.
02. You will upload a photo of your selected government-issued ID.
03. The ID verification process will ask that you take a selfie in order to match your ID.
04. Once accepted, you will have completed account sign-up and age verification.

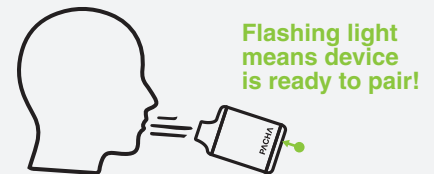

PACHA™ America's Best Vape™

2. Device Activation

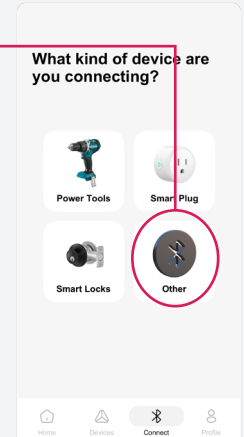

After you have created an account and verified your age, navigate back to the home screen and select "Connect device".

You must inhale through the device to power-on and make the device discoverable to the app.

B

01. After selecting "Connect device" and inhaling from the mouth piece to turn on the device, select "other" to find your specific device.
02. Your device will now be viewable and you can select "Connect device".
03. Once the device is connected, you will see a green power icon with the text "Device connected".

If you do not vape for 15 minutes, you will lose your connection and you will be required to inhale through the device to turn it back on and reconnect through the app.
